

Table of Contents:

Part I: Disease Origins and Context

- 1.The Story of Glioblastoma: History and Modern Correlates
- 2.Epidemiology of Glioblastoma and Trends in Glioblastoma Survivorship
- 3.The Molecular Pathogenesis of Glioblastoma
- 4.Diagnostic, Prognostic, and Predictive Biomarkers for Adult and Pediatric Gliomas in Clinical Practice
- 5.Multimodality Targeting of Glioma Cells

Part II: Standards of Medical and Surgical Treatment

- 6.Current Standards of Care in Glioblastoma Therapy
- 7.Radiographic Detection and Advanced Imaging of Glioblastoma
- 8.Principles and Tenets of Radiation Treatment in
- 9.Chemotherapeutics and Their Efficacy
- 10.Anti-angiogenic Therapy for Glioblastoma
- 11.Recurrent Glioblastoma
- 12.Principles of Surgical Treatment
- 13.Awake Craniotomy for Glioblastoma
- 14.Intraoperative Imaging of Glioblastoma
- 15.Minimally Invasive Targeted Therapy for Glioblastoma Laser Interstitial Thermal Therapy (LITT)
- 16.Local and Topical Treatment of Glioblastoma
- 17.Tumor Treating Electric Fields for Glioblastoma

Part III: Scientific Advances, Future Directions, and Socioeconomic Considerations

- 18.Brain Plasticity and Reorganization Before, During, and After Glioma Resection
- 19.Genetically modified T-cell therapy for glioblastoma
- 20.Early Detection of Glioblastoma
- 21.Health-Related Quality of Life and Neurocognitive Functioning after Glioblastoma Treatment
- 22.Socioeconomics and Survival
- 23.National and Global Economic Implications of Glioblastoma
- 24.Lessons Learned: Clinical Trials and Other Interventions for Glioblastoma
