

**Table of Contents:**

## SECTION 1: Fundamentals of HRCT

Overview of HRCT

Approach to HRCT Interpretation

**Ana**

Secondary Pulmonary Lobule

Gravitational Changes (Dependent Atelectasis)

Age-Related Changes

Normal Inspiration & Expiration

**Terminology and Signs**

Micronodules

Acinar Nodules

Tree-in-Bud Opacities

Ground-Glass Attenuation

Crazy-Paving Pattern

Mosaic Attenuation Pattern & Air-Trapping

Head Cheese Sign

Signet Ring Sign

Halo Sign

Reverse Halo Sign

Finger-in-Glove Sign

Honeycombing

Cyst

Flame-Shaped Nodules

**Distribution**

Peribronchovascular

Centrilobular

Perilymphatic

Random

Peripheral

**SECTION 2: Pathological Patterns of Injury**

Approach to Pathological Patterns of Injury

Diffuse Alveolar Damage

Diffuse Alveolar Hemorrhage With Capillaritis

Organizing Pneumonia

Pulmonary Fibrosis (Honeycombing)

Constrictive Bronchiolitis (Pathology)

### **SECTION 3: Large-Airway Disease**

Approach to Large-Airway Disease

Bronchiectasis

Allergic Bronchopulmonary Aspergillosis

Williams-Campbell Syndrome

Mounier-Kuhn Syndrome

Bronchocentric Granulomatosis

### **SECTION 4: Small-Airways Disease**

Approach to Small-Airways Disease

Infectious Bronchiolitis

Diffuse Aspiration Bronchiolitis

Respiratory Bronchiolitis

Follicular Bronchiolitis

Hypersensitivity Pneumonitis

Diffuse Panbronchiolitis

Idiopathic Constrictive Bronchiolitis

Swyer-James Syndrome

Bronchiolitis Obliterans Syndrome

DIPNECH

### **SECTION 5: Infection**

Approach to Infection

Bacterial Pneumonia

Parasitic Infection

Viral Pneumonia

Angioinvasive Aspergillosis

PCP Pneumonia

Tuberculosis

Nontuberculous Mycobacterial Infection

### **SECTION 6: Pneumoconiosis**

Approach to Pneumoconiosis

Silicosis & Coal-Worker's Pneumoconiosis

Asbestosis

Berylliosis

Talcosis

Hard-Metal Pneumoconiosis

## **SECTION 7: Neoplasms**

Approach to Neoplasms

Invasive Mucinous Adenocarcinoma (Diffuse)

Lymphangitic Carcinomatosis

Hematogenous Metastases

Endovascular Metastases and Tumor Emboli

Kaposi Sarcoma

Lymphangiomyomatosis

Reactive Lymphoproliferative Disorders

Neoplastic Lymphoproliferative Disorders

## **SECTION 8: Interstitial Pneumonias**

Approach to Interstitial Pneumonias

Idiopathic Pulmonary Fibrosis (Idiopathic UIP)

Idiopathic Nonspecific Interstitial Pneumonia

Cryptogenic Organizing Pneumonia

Acute Exacerbation of Interstitial Lung Disease

Acute Interstitial Pneumonia

Idiopathic Lymphoid Interstitial Pneumonia

Idiopathic Pleuroparenchymal Fibroelastosis

Airway-Centered Interstitial Fibrosis

Interstitial Pneumonia With Autoimmune Features (IPAF)

Approach to Smoking-Related Interstitial Lung Diseases

"Respiratory Bronchiolitis, Interstitial Lung Disease"

Desquamative Interstitial Pneumonia

Combined Pulmonary Fibrosis and Emphysema

## **SECTION 9: Autoimmune Diseases**

Approach to Autoimmune Diseases

"Connective Tissue Disease, Interstitial Lung Disease (CTD-ILD)"

Rheumatoid Arthritis

Progressive Systemic Sclerosis

Dermatomyositis/Polymyositis

Sjögren Syndrome

Mixed Connective Tissue Disease

Systemic Lupus Erythematosus

Granulomatosis With Polyangiitis (GPA)

Eosinophilic Granulomatosis With Polyangiitis (E-GPA)

Microscopic Polyangiitis

Ankylosing Spondylitis

Inflammatory Bowel Disease

### **SECTION 10: Vascular Disease**

Approach to Vascular Disease

Cardiogenic Pulmonary Edema

Hepatopulmonary Syndrome

Pulmonary Hypertension

Pulmonary Venoocclusive Disease

Pulmonary Capillary Hemangiomatosis

Talc & Cellulose Granulomatosis

### **SECTION 11: Inhalational, Inflammatory, Metabolic, & Post Treatment**

Approach to Inhalational, Inflammatory, Metabolic, & Post Treatment

#### ***Aspiration/Inhalation***

Spectrum of Aspiration-Related Disorders

Lipoid Pneumonia

Inhalational Injury

#### ***Inflamma***

Sarcoidosis

Histiocytic Disorders

Eosinophilic Disorders

#### ***Metabolic or Degenerative***

Amyloidosis

Light-Chain Deposition Disease

Pulmonary Alveolar Proteinosis

Metastatic Pulmonary Calcification

Diffuse Pulmonary Ossification (Dendriform & Nodular)

Emphysema

Hemosiderosis

***Post Treatment***

Radiation-Induced Lung Disease

Drug-Induced Lung Disease

**SECTION 12: Congenital**

Approach to Congenital

Familial Idiopathic Pulmonary Fibrosis

Birt-Hogg-Dubé Syndrome

Hermansky-Pudlak Syndrome

Tuberous Sclerosis

Neurofibromatosis

Alveolar Microlithiasis

Alpha-1 Antitrypsin Deficiency

Primary Ciliary Dyskinesia

Primary Immunodeficiencies

Chronic Granulomatous Disease

Cystic Fibrosis

Children's Interstitial Lung Disease (chILD)
