

Contents

1. Bones, joints, muscles

Bones	1
Bone tissue.....	2
Joints	5
Classification of joints.....	7
Kinematic chains.....	10
Muscles	13
Muscle contraction	15
Mechanical muscle model.....	17
Motor unit.....	17
Muscle function.....	19
Muscular force.....	19
Muscle role	26
Neural stimulation of muscle contraction	28
Electromyography	30
Muscles most frequently subjected to electromyography.....	33
Study of the motor nerve conduction velocity	33
Models to study movement	35
Behavioral model.....	35
Cognitive model	36
Ecological school.....	41
Postural control	42

2. Movements and biomechanics

Biomechanics	45
Kinematics	46
Simple motions.....	49
Statics	57
Forces.....	57
Center of gravity (or center of mass).....	64
Balance	66
Lever.....	69
Pulley.....	72
Wheel.....	72
Kinetics	74
Work and kinetic energy.....	77

Energy in biological processes	79
Power	79
Angular momentum	80
Conservation of energy and energy efficiency	82
Potential energy	82
Aerodynamics and sport	85

3. Head

Cranium	89
Mandible	90
Articular surface of the temporal bone	91
Temporomandibular joint	92
Temporomandibular joint movements	94
Masticatory muscles	96
Examination of the masticatory muscles	99
Mandible-cervical column as a functional unit	100
Muscles of facial expression	101
Examination of the muscles of facial expression	107
Extraocular muscles	110
Examination of the extraocular muscles	112
 <i>Palpation of the head</i>	114
Anatomical landmarks on the surface of the head and neck	118

4. Neck and cervical column

Upper cervical column	119
Atlanto-occipital joint	120
Median atlantoaxial joint	120
Lateral atlantoaxial joints	120
Ligaments of the upper cervical column	121
Movements of the upper cervical column	124
Lower cervical column	127
Ligaments of the lower cervical column	128
Movements of the lower cervical column	128
Radiology of the cervical column	130
 <i>Assessment of neck joint mobility</i>	132
Functional applications of neck mobility	134
Muscles of the neck	135
Extensor muscles of the head and neck	135
Flexor muscles of the head and neck	140
Lateral inclination of the head and neck	148
Rotation of the head and neck	149
 <i>Assessment of head and neck muscle strength</i>	150

Extensor muscles of the head and neck	150
Flexor muscles of the head and neck	151
Infrahyoid muscles	153
Genioglossus (protrusion of the tongue)	153
 <i>Palpation of the cervical column</i>	154
Anatomical landmarks on the surface of the head and neck	158
5. Vertebral column and movements of the trunk	
Vertebral column	159
Functions	159
Morphology	159
Structure of the vertebrae	162
Thoracic vertebrae	163
Cervical vertebrae	164
Lumbar vertebrae	164
Articular facets of the vertebral processes	165
Vertebral resistance to pressure	166
Joints of the vertebral column	167
Joints of the vertebral bodies	167
Joints of the vertebral arch	172
Ligaments of the vertebral column	173
Functional spinal unit	175
Unit of motion	175
Movements of the vertebral column	176
Flexion-extension of the vertebral column	177
Lateral inclination of the vertebral column	178
Rotation of the vertebral column	179
Muscles of the vertebral column	180
Long intrinsic muscles of the vertebral column	182
Muscles of the abdomen	187
Action of the muscles in the movements of the vertebral column and trunk	189
Extension of the vertebral column	189
Anterior flexion of the vertebral column	190
Lateral inclination of the vertebral column	191
Rotation of the vertebral column	191
 <i>Assessment of trunk mobility</i>	192
Measurement of trunk joint mobility	192
Measurement of the length of the extensor muscles of the trunk (touch the toes test)	193
Measurement of the degrees of force of the flexor, extensor and rotator muscles of the trunk	194
Functional mobility of the trunk	197
Anatomical landmarks on the surface of the trunk	198

6. Thorax and thoracic column

Thoracic cage	199
Sternum	200
Ribs	200
Thoracic column	201
Joints of the thoracic cage	204
Costovertebral joints	204
Sternocostal joints	206
Interchondral joints	207
Intersternal joints	208
Movements of the ribs	208
Respiratory muscles	211
Inspiratory muscles	211
Expiratory muscles	215
Function of the secondary inspiratory and expiratory muscles	218
Respiratory mechanics	218
 <i>Palpation of the thoracic column and thorax</i>	219
Measuring the expansion of the thorax	224

7. Shoulder and pectoral girdle

Scapula	225
Clavicle	227
Humerus	228
Pectoral (shoulder) girdle	230
Acromioclavicular joint	231
Sternoclavicular joint	233
Glenohumeral (shoulder) joint	236
Ligaments of the glenohumeral (shoulder) joint	239
Subacromial space	241
Subtendinous subacromial bursae	241
Other joints of the shoulder	242
Movements of the clavicle	243
Movements of the scapula	243
Movements of the glenohumeral (shoulder) joint	245
 <i>Assessment of scapular joint mobility</i>	248
 <i>Assessment of shoulder joint mobility (glenohumeral joint)</i>	250
Active mobility of the joints of the upper limb	254
Functional aspects of shoulder joint mobility	255
Interdependence of shoulder and trunk movement components during the execution of functional activities	255
Muscles of the shoulder	260
Muscles attaching the pectoral girdle to the trunk	264

Muscles attaching the pectoral girdle to the humerus.....	269
Muscles attaching the trunk to the humerus.....	275
Muscles that insert on the clavicle.....	276
Action of the muscles in the movements of the shoulder	277
Abduction of the shoulder with lateromedial elevation.....	277
Adduction of the shoulder.....	280
Flexion of the shoulder with anterosuperior elevation.....	281
Extension of the shoulder.....	282
Rotation of the shoulder on the horizontal plane.....	283
Rotation of the shoulder on the axis of the humerus.....	284
 <i>Assessment of the length of the fibers of the pectoralis major and pectoralis minor</i>	285
 <i>Strength assessment of the shoulder muscles</i>	286
Abduction and lateral rotation of the scapula.....	286
Elevation of the scapula.....	288
Adduction of the scapula.....	289
Adduction and internal rotation of the scapula.....	290
Depression and adduction of the scapula.....	291
90° flexion of the shoulder.....	292
Flexion and adduction of the shoulder.....	293
Extension of the shoulder.....	294
90° abduction of the shoulder.....	295
Internal rotation of the shoulder on the horizontal plane.....	296
External rotation of the shoulder on the horizontal plane.....	297
Internal rotation of the shoulder on the axis of the humerus.....	298
External rotation of the shoulder on the axis of the humerus.....	299
Functional aspects of the muscles of the shoulder	300
Elevation of the shoulder.....	300
Adduction and extension of the shoulder.....	301
Flexion and adduction of the shoulder.....	301
Internal rotation of the shoulder.....	301
External rotation of the shoulder.....	302
 <i>Palpation of the shoulder and pectoral (shoulder) girdle</i>	303
Anatomical landmarks on the surface of the shoulder and pectoral girdle	308
8. Elbow	
Distal extremity of the humerus	309
Bones of the forearm	310
Radius (lateral bone of the forearm).....	310
Ulna (medial bone of the forearm).....	311
Elbow joints	313
Humeroradioulnar joint.....	313
Proximal radioulnar joint.....	315

Distal radioulnar joint	317
Capsule of the elbow joint	318
Capsule of the distal radioulnar joint	320
Ligaments of the elbow joint	321
Ligaments and reinforcing structures of the proximal and distal radioulnar joints	324
Movements of the elbow joint	325
Flexion-extension of the humeroulnar and humeroradial joints	325
Pronosupination of the proximal and distal radioulnar joints	327
 <i>Assessment of elbow joint mobility</i>	330
Flexion-extension of the elbow	330
Pronosupination of the elbow	331
Functional aspects of the elbow joint	332
Muscles of the elbow	333
Anterior muscles of the arm and forearm	335
Posterior muscles of the arm and forearm	335
Lateral muscles of the forearm	335
Action of the muscles in the movements of the elbow	336
Flexion of the elbow	336
Extension of the elbow	341
Supination of the elbow	341
Pronation of the elbow	343
 <i>Assessment of the length and stretch of the fibers of the biceps brachii and triceps brachii</i>	344
 <i>Assessment of muscle strength</i>	345
Flexion of the elbow	345
Extension of the elbow	347
Supination of the elbow	348
Pronation of the elbow	349
Functional aspects of the muscles of the elbow	350
Flexion of the elbow	350
Extension of the elbow	351
Supination of the elbow	353
Pronation of the elbow	353
 <i>Palpation of the elbow</i>	354
Anatomical landmarks on the surface of the elbow and forearm	358
9. Wrist and hand	
Distal extremities of the radius and ulna	359
Bones of the hand	359
Carpal bones	359
Metacarpals	359
Skeleton of the digits	360
Joints of the wrist and hand	361

Radiocarpal joint	361
Midcarpal joint	363
Intercarpal joints	364
Carpometacarpal joints	365
Intermetacarpal joints	366
Metacarpophalangeal joints	366
Interphalangeal joints	367
Capsules and ligaments of the joints of the wrist and hand	368
Ligaments of the wrist and hand	368
Ligaments of the metacarpophalangeal and interphalangeal joints	373
Subdivision of the joints of the wrist and hand into columns	375
Movements of the wrist	378
Flexion (palmar flexion) and extension (dorsal flexion) of the wrist	378
Radial abduction (true abduction) and ulnar abduction (adduction) of the wrist	379
Movements of the digits	380
Movements of the thumb	380
Movements of the 2 nd , 3 rd , 4 th and 5 th digits	384
 <i>Assessment of the wrist and hand joint mobility</i>	386
Flexion-extension of the wrist	386
Radial abduction and ulnar abduction of the wrist	387
Metacarpophalangeal flexion-extension of the 2 nd , 3 rd , 4 th and 5 th digits	388
Metacarpophalangeal abduction-adduction of the 2 nd , 3 rd , 4 th and 5 th digits	389
Interphalangeal flexion-extension of the 2 nd , 3 rd , 4 th and 5 th digits	390
(Active) metacarpophalangeal and interphalangeal flexion of the 2 nd , 3 rd , 4 th and 5 th digits	391
Carpometacarpal flexion-extension of the thumb (between the trapezium and the first metacarpal)	392
Metacarpophalangeal and interphalangeal flexion-extension of the thumb	393
Carpometacarpal abduction and adduction of the thumb	394
Opposition of the thumb	394
Functional aspects of the joints of the wrist and hand	395
Arches of the hand	396
Muscles of the wrist and hand	398
Topographical classification of the muscles of the wrist and hand	405
Action of the muscles in the movements of the wrist	406
Palmar flexor muscles of the hand (from greatest to least muscular force)	406
Dorsal flexor muscles of the hand (from greatest to least muscular force)	408
Radial abductor muscles of the hand (from greatest to least muscular force)	409
Ulnar abductor muscles of the hand (from greatest to least muscular force)	410
Action of the muscles in the movements of the hand	410
Extrinsic muscles of the hand	410
Intrinsic muscles of the hand	411
 <i>Assessment of the length of muscle fibers</i>	416

 <i>Assessment of the muscular force</i>	418
Flexion and radial abduction of the wrist.....	418
Ulnar flexion and abduction of the wrist.....	419
Flexion of the wrist.....	420
Extension (dorsal flexion) and radial abduction of the wrist.....	420
Extension and ulnar abduction of the wrist.....	421
Extension of the wrist.....	422
Metacarpophalangeal extension of the fingers.....	423
Metacarpophalangeal abduction of the fingers.....	423
Metacarpophalangeal adduction of the fingers.....	424
Metacarpophalangeal flexion and interphalangeal extension of the fingers.....	425
Metacarpophalangeal flexion of the little finger.....	425
Interphalangeal flexion proximal to the fingers.....	426
Distal interphalangeal flexion of the fingers.....	426
Interphalangeal flexion of the thumb.....	427
Metacarpophalangeal flexion of the thumb.....	427
Interphalangeal extension of the thumb.....	428
Metacarpophalangeal extension of the thumb.....	429
Radial abduction of the thumb.....	429
Palmar abduction of the thumb.....	430
Adduction of the thumb.....	430
Opposition of the thumb to the little finger.....	431
Prehension and grip functions	432
Prehension.....	432
Grip.....	432
 <i>Palpation of the wrist and hand</i>	437
Anatomical landmarks on the surface of the wrist and hand	441

10. Hip and pelvis

Pelvis	443
Hip bone.....	444
Sacrum.....	446
Coccyx.....	448
Diameters of the pelvis.....	449
Superior extremity and shaft (body) of the femur.....	450
Joints of the pelvis	451
Sacroiliac joint.....	451
Pubic symphysis.....	452
Lumbosacral joint.....	452
Sacrococcygeal joint.....	453
Coxofemoral joint (hip joint).....	453

Ligaments of the joints of the pelvis..... 454

- Sacroiliac joint..... 454
- Pubic symphysis..... 455
- Lumbosacral joint..... 456
- Sacrococcygeal joint..... 456
- Coxofemoral joint (hip joint)..... 457

Movements of the pelvis..... 459

- Anteversion (nutation or flexion of the pelvis)..... 459
- Retroversion (counternutation or extension of the pelvis)..... 460
- Normoversion of the pelvis..... 460
- Other movements of the pelvis..... 461
- Functional aspects..... 462

Movements of the hip..... 463

- Flexion of the hip..... 463
- Extension of the hip..... 464
- Abduction of the hip..... 465
- Adduction of the hip..... 466
- External rotation (or supination) of the hip..... 467
- Internal rotation (or pronation) of the hip..... 468
- Circumduction of the hip..... 469

Stability of the hip joint..... 470

- Angles and axes of the femur..... 470
- Elements for stabilization of the hip joint..... 473

 *Assessment of the passive joint mobility of the hip*..... 474

- Flexion of the hip..... 474
- Extension of the hip..... 474
- Abduction of the hip..... 475
- Adduction of the hip..... 475
- External and internal rotation of the hip..... 476

General analysis of the active joint mobility of the lower limb..... 477

Functional aspects of the hip joint..... 478

- Flexion and extension of the hip..... 478
- Abduction and adduction of the hip..... 479
- External and internal rotation of the hip..... 479

Muscles of the hip..... 480

- Topographical classification of the muscles of the hip..... 484

Action of the muscles in the movements of the hip..... 485

- Flexion of the hip..... 485
- Extension of the hip..... 489
- Abduction of the hip..... 493
- Adduction of the hip..... 495
- External rotation of the hip..... 496
- Internal rotation of the hip..... 496

 *Assessment of the length of muscle fibers*..... 497

	<i>Assessment of the muscular force</i>	501
	Flexion of the hip	501
	Flexion, abduction and external rotation of the hip with knee flexed	502
	Extension of the hip	502
	Abduction of the hip	503
	Abduction and flexion of the hip	504
	Weakness of the abductor muscles of the hip	505
	Adduction of the hip	506
	External rotation of the hip	507
	Internal rotation of the hip	508
	Functional aspects of the muscles of the hip	509
	<i>Palpation of the pelvis and hip</i>	511
	Anatomical landmarks on the surface of the pelvis and hip	515

11. Knee

	Inferior extremity of the femur	517
	Patella	518
	Superior extremity and shaft (body) of the tibia	518
	Superior extremity and shaft (body) of the fibula	520
	Knee joints	521
	Tibiofemoral joint	521
	Patellofemoral joint	523
	(Superior) tibiofibular joint	524
	Menisci of the tibiofemoral joint	525
	Movements of the menisci	526
	Ligaments of the knee	528
	Cruciate ligaments	530
	Capsule of the tibiofemoral joint	532
	Infrapatellar fat pad (of Hoffa)	533
	Serous or synovial bursae	533
	Movements of the patella	534
	Movements of the knee	536
	Flexion of the knee	536
	Extension of the knee	537
	Hyperextension (absolute extension) of the knee	537
	Rotation of the knee	538
	<i>Assessment of the passive joint mobility of the knee</i>	539
	Flexion-extension of the knee	539
	Mobility of the patella	540
	Rotation of the tibia	541
	Functional aspects of the knee joint	542
	Muscles of the knee	543

Classification of the muscles of the knee	545
Action of the muscles in the movements of the knee	546
Flexion of the knee.....	546
Extension of the knee.....	550
Rotation of the knee	550
 <i>Assessment of the length of muscle fibers</i>	552
 <i>Assessment of the muscular force</i>	554
Flexion of the knee.....	554
Extension of the knee.....	556
Functional aspects of the muscles of the knee	558
Flexor muscles of the knee.....	558
Extensor muscles of the knee.....	559
 <i>Palpation of the knee</i>	560
Anatomical landmarks on the surface of the knee	563

12. Ankle and foot

Inferior extremity of the tibia	565
Inferior extremity of the fibula	566
Tarsus	567
Talus.....	569
Calcaneus.....	570
Cuboid.....	571
Navicular	571
Cuneiforms	571
Regions of the foot	572
Metatarsals and phalanges	573
Metatarsus	573
Phalanges	573
Osteoarticular columns.....	573
Metatarsal arch.....	573
Arches of the foot.....	573
Hallux valgus	574
Joints of the ankle and foot	575
Joints of the ankle	575
Joints of the foot.....	575
Distal tibiofibular joint.....	576
Ankle joint.....	577
Subtalar (talocalcaneal) joint	578
Transverse tarsal joint	579
Joints between the bones of the distal tarsal row.....	580
Tarsometatarsal joints	580
Intermetatarsal joints	580

Metatarsophalangeal joints	580
Interphalangeal joints.....	580
Ligaments of the ankle and foot joints	581
Distal tibiofibular joint.....	581
Ankle joint.....	581
Subtalar (talocalcaneal) joint	583
Transverse tarsal joint.....	583
Joints between the bones of the distal tarsal row.....	584
Tarsometatarsal joints	584
Intermetatarsal joints	584
Metatarsophalangeal and interphalangeal joints.....	584
Bursa of the calcaneal tendon	584
Movements of the ankle and foot joints	585
Ankle joint.....	585
Subtalar (talocalcaneal) joint	586
Transverse tarsal joint (medial or talonavicular and lateral or calcaneocuboid joints).....	589
Joints between the bones of the distal tarsal row and tarsometatarsal and intermetatarsal joints.....	589
Metatarsophalangeal joints	589
Interphalangeal joints.....	589
 <i>Assessment of the passive joint mobility of the ankle and foot</i>	590
Dorsiflexion and plantar flexion of the ankle.....	590
Inversion and eversion of the foot.....	591
Metatarsophalangeal flexion and extension of the proximal phalanges.....	592
Metatarsophalangeal abduction and adduction of the great toe	593
Interphalangeal flexion-extension of the great toe	594
Functional aspects of the ankle and foot joints	595
Function of the foot.....	595
Mobility of the ankle.....	595
Mobility of the foot	595
Muscles of the ankle and foot	596
Topographical classification of the muscles of the leg	601
Topographical classification of the muscles of the foot.....	603
Action of the muscles in the movements of the ankle and foot	605
Plantar flexion of the ankle.....	605
Dorsiflexion of the ankle	609
Inversion of the foot	611
Eversion of the foot	611
Extension of the toes	612
Flexion of the toes	612
Abduction and adduction of the toes	614
 <i>Assessment of the length of muscle fibers</i>	616

 <i>Assessment of the muscular force</i>	618
Dorsiflexion of the ankle and inversion of the foot	618
Plantar flexion of the ankle.....	619
Inversion of the foot	621
Eversion of the foot	622
Movements of the toes	623
Functional aspects of the muscles of the ankle and foot	626
Plantar flexion of the ankle.....	626
Dorsiflexion of the ankle	626
Inversion and eversion of the foot.....	626
Flexion and extension of the toes	627
Intrinsic muscles of the foot and support of the arches of the foot	627
 <i>Palpation of the ankle and foot</i>	628
Anatomical landmarks on the surface of the ankle and foot	634

13. Application aspects

Upright position (orthostatism)	635
Posturography (stabilometry).....	638
Walking	639
Gait cycle.....	639
Ontogeny.....	642
Neurological aspects of human locomotion	642
Gait kinematics.....	643
Evaluation of the displacements of the center of gravity.....	643
Evaluation of the displacements of the body segments	646
Muscles of the trunk and lower limb involved during walking	653
Gait biomechanics	654
Variations in balance and displacements of the body's center of gravity during walking.....	655
Gait analysis	656
Running	659
Phases of the running cycle (referring, for example, to the right foot).....	659
Duration of the running cycle.....	659
Running speed.....	659
Characteristics of running strides	660
Running kinematics	660
Running kinetics	661
Jumping	662
Kicking	663
Throwing	664
Recommended readings	666
Index	667
