

# TABLE OF CONTENTS

<b>CHAPTER 1</b>	
<b>THE ART OF HEALING .....</b>	<b>1</b>
<b>Why the Body Heals .....</b>	<b>2</b>
<b>The Body Heals: Basic Biology .....</b>	<b>5</b>
<b>Minimize Trauma, Maximize Perfusion.....</b>	<b>21</b>
<b>The Continuum of Healing .....</b>	<b>22</b>
• Optimize hemostasis .....	22
• Reduce inflammation .....	23
• Leverage proliferation .....	23
• Orchestrate maturation .....	23
<b>Stress and Healing .....</b>	<b>24</b>
<b>The Continuum of Healing Simplified.....</b>	<b>25</b>
<b>CHAPTER 2</b>	
<b>THE ART OF TISSUE MANAGEMENT .....</b>	<b>27</b>
<b>Attention to Detail .....</b>	<b>28</b>
• Individual cell integrity.....	28
• Cell adhesion .....	28
• Tissue layers .....	30
• Blood supply .....	32
• Blood flow .....	33
• Cleanup .....	33
• Tug of war .....	33
<b>Suturing .....</b>	<b>35</b>
• Knot tying .....	36
<b>CHAPTER 3</b>	
<b>THE ART OF PREPARATION .....</b>	<b>39</b>
<b>Mise en place. Everything in its place .....</b>	<b>40</b>
• Efficiency. Predictability. Consistency.....	40
• Steps of mise en place: Be as efficient as possible .....	40
• Know the procedure.....	42
• Know your instruments .....	42
• Set up your workspace .....	42
<b>Instruments .....</b>	<b>46</b>
• Surgical blades .....	46
• Scissors.....	48
• Forceps .....	49
• Periotome. Luxator. Elevator.....	53
• Cryer elevator.....	59
• Retractors .....	60
• Angled curettes .....	61
• Curved hemostats .....	62
• Rongeur.....	63
• Needle driver .....	64
• Castroviejo needle driver .....	65
• Surgical handpiece.....	66
• Burs.....	66
• Dimensions .....	67
<b>Beyond Instruments .....</b>	<b>67</b>
• Evaluation .....	67
• Radiographic evaluation.....	70
• Assumption and curiosity.....	72

<b>CHAPTER 4</b>	
<b>THE ART OF EXODONTIA . . . . .</b>	<b>75</b>
<b>Natural Tooth Retention . . . . .</b>	<b>77</b>
• Mechanical retention: bone . . . . .	77
• Biomechanical retention: periodontal ligament (PDL) . . . . .	79
<b>Exodontia Evaluation . . . . .</b>	<b>81</b>
• Bone . . . . .	81
• Periodontal ligament . . . . .	82
• Tooth . . . . .	83
• Soft tissue . . . . .	88
• Papilla . . . . .	90
• Flap design . . . . .	90
<b>Extraction . . . . .</b>	<b>93</b>
• Simple machines . . . . .	93
<b>Extend. Expand. Extract. . . . .</b>	<b>95</b>
• Extend the ligament . . . . .	95
• Expand the socket . . . . .	99
• Extract the tooth . . . . .	99
<b>Sectioning and Bone Removal . . . . .</b>	<b>99</b>
<b>Nuances of Exodontia . . . . .</b>	<b>101</b>
• Retaining root fragments . . . . .	101
• Elevating against adjacent teeth . . . . .	104
• Protecting soft tissue . . . . .	105
• Removing more bone . . . . .	105
• The cowhorn . . . . .	106
<b>The Socket . . . . .</b>	<b>109</b>
• Apical pathology . . . . .	111
<b>Alveoloplasty . . . . .</b>	<b>116</b>
<b>Extraction Tips and Bailouts . . . . .</b>	<b>118</b>
<b>CHAPTER 5</b>	
<b>IMPACTED EXODONTIA . . . . .</b>	<b>121</b>
<b>Visualization . . . . .</b>	<b>123</b>
<b>Classification . . . . .</b>	<b>124</b>
<b>Impaction Depth . . . . .</b>	<b>130</b>
<b>Follicle Size . . . . .</b>	<b>131</b>
<b>Bone Density . . . . .</b>	<b>131</b>
• Drilling principles . . . . .	134
<b>Root Form . . . . .</b>	<b>135</b>
• Fully developed roots . . . . .	135
• Root curvature . . . . .	135
• Undeveloped roots . . . . .	136
<b>Molar Proximity . . . . .</b>	<b>137</b>
• Separated . . . . .	137
• Nested . . . . .	137
• Intimate . . . . .	137
• Overlapped . . . . .	138
<b>Patient Age . . . . .</b>	<b>138</b>
<b>Oral Cavity . . . . .</b>	<b>138</b>
<b>Soft Tissue Management . . . . .</b>	<b>140</b>
• Flap design . . . . .	141
• Periosteum . . . . .	143
• Maxillary third molars . . . . .	144
• Buccal fat pad . . . . .	149
• Mandibular third molars . . . . .	150
<b>Hard Tissue Management . . . . .</b>	<b>157</b>
• Lower third molar hard tissue . . . . .	157
• Hand instruments . . . . .	157
• Drilling . . . . .	163
• More drilling . . . . .	168
• Complicated impaction patterns . . . . .	173
<b>Upper Third Molar . . . . .</b>	<b>184</b>
<b>Coronectomy . . . . .</b>	<b>189</b>
• Evaluation . . . . .	190
• Treatment options . . . . .	193
• Coronectomy procedure . . . . .	195
<b>Changing Technology: Dynamic Navigation . . . . .</b>	<b>199</b>
• Navigated coronectomy . . . . .	199
• Guided biopsy . . . . .	201
• Guided injection . . . . .	202
<b>The Art of the Expose and Bond . . . . .</b>	<b>204</b>
• Clearing the path . . . . .	205
• Judicious bone removal . . . . .	205
• Attaching a bracket . . . . .	207

<b>CHAPTER 6</b>	
<b>COMPLICATIONS OF EXODONTIA .....</b>	<b>211</b>
Displaced Teeth and Roots .....	213
Sinus Communication .....	215
Oral-Antral Fistula .....	220
Retained Roots .....	220
Fractured Instruments .....	221
Bleeding .....	222
• Anticoagulation .....	222
• Intraoperative bleeding .....	224
Post-Operative Bleeding .....	229
• Liver clot/currant jelly clot .....	229
Nerve Injury and Healing .....	230
• The signal journey .....	233
• Nerve trauma .....	235
• Visualizing potential injury .....	236
• Nerve injury management .....	236
<b>CHAPTER 7</b>	
<b>IMPLANT ARCHITECTURE .....</b>	<b>239</b>
Evaluation .....	243
• Inventory of resources .....	245
• Blood supply .....	250
• Soft tissue quality .....	252
• Esthetic soft tissue evaluation .....	253
Implant Design .....	258
The Goal: Stability .....	258
• The designers .....	265
• The design .....	265
• Surface .....	267
• Size: The balancing act .....	277
• Platform switching .....	279
• Platform level .....	280
• Restorative components .....	282
<b>CHAPTER 8</b>	
<b>IMPLANT SURGICAL PRINCIPLES:</b>	
<b>THE MOVEMENT OF IMPLANT SURGERY .....</b>	<b>289</b>
Theme 1: Implant Position .....	291
• Variations .....	291
Theme 2: Protect the Bone .....	295
• Variations .....	297
Theme 3: Stability .....	300
• Variations .....	300
Theme 4: Aseptic Implant .....	307
• Variations .....	307
Theme 5: Abutment Selection .....	308
• Variations .....	310
Theme 6: Operative Imaging .....	313
• Variations .....	314
Theme 7: Grafting and Timing .....	317
• Bone healing .....	317
• Patient specific factors .....	319
• Site specific factors .....	321
Theme 8: Immediate Implant .....	324
• Planning .....	324
• Radiographic .....	326
• Clinical .....	328
• Site preparation .....	329
<b>CHAPTER 9</b>	
<b>IMPLANT SITE DEVELOPMENT .....</b>	<b>343</b>
Hard Tissue Development .....	344
• Minimally traumatic extraction .....	346
• Ridge preservation .....	349
• Ridge augmentation .....	357
• Sinus graft .....	364
• Surgical protocol .....	367
• Sinus augmentation intraoperative complications .....	382
Soft Tissue Development .....	385
• Tissue manipulation .....	385
• Simple tips for soft tissue development .....	396

<b>CHAPTER 10</b>	
<b>THE ART OF INFECTION MANAGEMENT</b>	<b>401</b>
<b>Management Principles</b>	<b>403</b>
• The body's inherent defense.	404
• The surgeon's armamentarium.	405
<b>Practical Classification</b>	<b>406</b>
• Acute infections can be further classified by duration, onset and location.	408
<b>Evaluation</b>	<b>416</b>
• Clinical evaluation.	416
• Evaluating the patient.	419
• Radiographic evaluation.	420
<b>Treatment</b>	<b>420</b>
• The case for antibiotic therapy without (or before) surgery	420
• The case for surgery without antibiotics	421
• The case for combined surgical and antibiotic therapy.	421
• Surgical drainage	421
<b>Antibiotics</b>	<b>425</b>
• Principles of antibiotic treatment.	425
• Bacteria	426
• Common antibiotics of oral surgery	430
• Risks of antibiotic treatment	438
• Topical antibiotic and antiseptic therapy	442
• The unresolving infection and post-operative infection.	444
<b>Real World Challenge</b>	<b>445</b>
<b>ACKNOWLEDGMENTS</b>	<b>447</b>
